Subject: 35th Avenue Superfund Site - Citizens want to talk to EPA representative

Importance: High

Good morning Anita,

ATSDR staff met with the Fairmont Neighborhood Association to share the information in the N. Birmingham Air public health assessment. During the meeting two people asked to talk to EPA about the lead soil remediation project that is on-going at this time. They indicated they would like to talk to someone other than the site OSCs to discuss their concerns. I assured them I would provide this information to EPA so that someone would contact them.

Here is the contact information for the people:

1. (b) (6)

I will let both of them know I have forwarded their contact information to EPA. Thanks for having someone call them to discuss their concerns.
